

# The fit and forget solution to frozen condensate pipes

Condensulate offers a low cost, innovative passive solution to the issue of freezing condensate from condensing boilers.

## KEY BENEFITS OF CONDENSULATE

- Easy to install – adaptors included
- Fully integrated, insulated and flexible pipe
- Not vulnerable to UV degradation, vandalism or vermin when sleeved in wastepipe

- **Condensulate Standard** is manufactured from 20mm black flexible conduit encased in a polyethylene pipe insulation material with a tough plastic skin for added protection
- **Condensulate Xtreme** is manufactured from 20mm black flexible conduit encased in a cutting edge technology, 'SPACELOFT INSULATION' material
- This unique product can be easily installed retrofit or onto new heating systems
- Independently tested by the Building Research Establishment up to -20°
- Non-mechanical, no power needed
- BS5864-2010 compliant
- BRE report number 269909
- Supplied in both 3-metre and 10-metre trade packs

CONDENSULATE IS EASY TO INSTALL AND ALL ADAPTORS ARE INCLUDED
